CENTER FOR STUDENT RESEARCH

The Center for Student Research (https://twu.edu/center-student-research/) (CSR) promotes an enhanced educational experience for graduate and undergraduate students by providing opportunities for meaningful interaction between faculty and students through support, education, and programming in research and creative activities. The CSR offers student funding in the form of research grants and research presentation grants to support travel for presentation and publication. Professional development opportunities are available through workshops and other activities. The CSR is also responsible for recording and reporting student research activity for the TWU System.
