

MASTER OF SCIENCE IN KINESIOLOGY (BIOMECHANICS AND MOTOR BEHAVIOR)

Web Site: <https://twu.edu/kinesiology/graduate-programs/biomechanics/>

Degree Requirements

Prerequisites

- Anatomy (Functional Anatomy)
- Kinesiology & Biomechanics
- Motor Learning & Control
- Exercise Physiology

Prerequisite courses may be taken during the program but will not be counted toward the degree.

Total Semester Credit Hours Required

Thesis Option: 30 semester credit hours (SCH)

Publishable Manuscript Option: 36 semester credit hours (SCH)

Thesis Option (30 SCH)

Code	Title	SCHs
Kinesiology Core		
KINS 5023	Methods of Research	6
KINS 5033	Applied Statistical Principles	
Biomechanics & Motor Behavior Emphasis		
KINS 5513	Mechanical Analysis of Human Motion	12
KINS 6563	Human Motor Control	
KINS 6623	Biomechanical Analysis I: Motion Analysis	
KINS 6643	Biomechanical Analysis II: Data Acquisition and Instrumentation	
Biomechanics & Motor Behavior Electives		
Select 6 SCH in consultation with advisor		
KINS 5903	Special Topics	6
KINS 5813	Research in Kinesiology	
KINS 5913	Independent Study	
KINS 6523	Advanced Biomechanics	
KINS 6573	Motor Learning and Performance	
MATH 5913	Independent Study	
Culminating Experience		
KINS 5983	Thesis	3
KINS 5993	Thesis	3
Total SCHs		30

Publishable Manuscript Option (36 SCH)

Code	Title	SCHs
Kinesiology Core		
KINS 5023	Methods of Research	6
KINS 5033	Applied Statistical Principles	

Biomechanics & Motor Behavior Emphasis		15
KINS 5513	Mechanical Analysis of Human Motion	
KINS 6523	Advanced Biomechanics	
KINS 6563	Human Motor Control	
KINS 6623	Biomechanical Analysis I: Motion Analysis	
KINS 6643	Biomechanical Analysis II: Data Acquisition and Instrumentation	
Biomechanics & Motor Behavior Electives		12
Select 12 SCH in consultation with advisor		
KINS 5123	Professional Affiliation	
KINS 5903	Special Topics	
KINS 5913	Independent Study	
KINS 6573	Motor Learning and Performance	
MATH 5913	Independent Study	
Culminating Experience		3
KINS 5973	Professional Paper and Project	
Total SCHs		36

Optional Minor (6 SCH)

Students pursuing M.S. with Biomechanics and Motor Behavior emphasis typically do a minor in Math.

SHPK Master's Program Policies

Culminating Experience

After completing 24 semester credit hours of required coursework (including core courses), School of Health Promotion and Kinesiology students are eligible to complete their culminating experience. Students in the Biomechanics and Motor Behavior emphasis area may choose one of two culminating options: 1) Thesis or 2) Publishable Manuscript. Students are responsible for reviewing their emphasis area degree requirements, consulting with emphasis area faculty, and familiarizing themselves with the available options. Specific steps to complete each culminating experience option are located within the School of Health Promotion and Kinesiology (SHPK) Graduate Student Handbook.

Thesis

All School of Health Promotion and Kinesiology master's students who select the thesis option are required to prepare, present, and orally defend a thesis reflecting substantial and independent research. The Thesis Research Committee must be formed according to Graduate School policies. Committees must include a minimum of three faculty members, with one faculty member being from outside the major/emphasis area. The School of Health Promotion and Kinesiology stipulates that a 10-class day reading period be granted to every research committee member for any thesis-related documents. No thesis research committee meetings may be scheduled or conducted during the last two weeks (last week of classes and finals week) of any semester. Refer to the Graduate School policy for Thesis grading options. Any student in SHPK receiving two consecutive enrolled semesters of LP (Lack of Adequate Progress) and/or NP (No Progress) grades or three cumulative semesters of LP and/or NP grades will be dismissed from the program.

Publishable Manuscript

All School of Health Promotion and Kinesiology master's students who select the manuscript option must independently prepare a publishable manuscript reflecting substantial and original research. Students must consult with the major professor to define and refine the project's scope then form a three-person graduate faculty Manuscript Committee to include the major professor and two additional members. One member

must be from outside the major/emphasis area. Students are expected to continue working on the manuscript to prepare and submit it for journal publication within the three months immediately following graduation. Use and adherence to a formal authorship agreement are highly recommended. Three consecutive months of insufficient progress will result in the major professor assuming authorship responsibilities toward publication.
