

MASTER OF SCIENCE IN CHILD LIFE

Web Site: <https://twu.edu/human-development-family-studies-counseling/graduate-programs/child-life/>

The master's degree in Child Life covers child growth and development from infancy through adolescence, including cognitive, social, emotional, and physical development with an emphasis on how health and hospitalization can impact development in all domains, as well as family dynamics and relationships. A master's degree in Child Life prepares graduates to work with children and families in healthcare and community settings. Completion of this degree, along with required Child Life Practicum and Internship, makes graduates eligible to pursue certification through the Association of Child Life Professionals (ACLP).

The M.S. in Child Life program is endorsed by the Association of Child Life Professionals (ACLP) (<https://www.childlife.org/certification/certification-resources/endorsed-program-directory/>). The program is 100% online.
