

BIOLOGY MINORS

Web Site: <https://twu.edu/biology/undergraduate-programs/minors/>

These are minors administered by the Biology department. The Neuroscience minor, and in some cases, the General Science minor, are appropriate for Biology majors as well as students with other majors at TWU. The Biology and Pre-Med minors are specifically designed for students with majors other than Biology.

Biology

A minor in biology requires 18 semester credit hours of Biology courses in consultation with the advisor, six of which must be advanced.

General Science

The minor in General Science requires 18 semester credit hours, six of which must be advanced. These must be divided among three of the following: chemistry, biology, physics, and science courses. If the major is biology or chemistry the hours must be divided between two of the remaining three.

Neuroscience

The minor in Neuroscience requires 20 hours and allows students to gain an appreciation for and understanding of the human brain from multiple perspectives. This minor is offered in collaboration with the Department of Psychology.

Pre-Med

All pre-med students must take the following courses, which are required prerequisites for medical school, for success on the Medical College Admission Test (MCAT), or both. Lecture and lab must be taken concurrently; no exceptions. Students must earn a grade of "C" or higher. Eighteen of the required semester credit hours may also satisfy core requirements as applicable.

Scientific Illustration

Scientific Illustration is an interdisciplinary program focusing on the creation of images to depict and clarify scientific concepts. The Scientific Illustration minor combines study in biology with instruction in the visual arts to teach students how to merge their artistic talent with knowledge of natural science to develop strong visual communication skills.

Requirements

23-24 semester hours total, including 8 hours of biology, 12 hours of art, and 3-4 hours of electives.
