

DIVISION OF ENVIRONMENTAL SCIENCES

Courses

Contact hours identified in the course descriptions are based on a 15-week term. Students who enroll in Summer or mini-terms are expected to meet the same total number of contact hours as a 15-week term.

ENVS 1213. Introduction to Environmental Science. (TCCN ENVR 1301)
Transdisciplinary study of Earth's environmental systems and processes, and human interactions with them. Exploration of complex real-world environmental issues through the lens of biophysical and social sciences. Satisfies Life and Physical Sciences Core (30). Three lecture hours a week. Credit: Three hours.

ENVS 4903. Special Topics. Advanced studies in environmental science. May be repeated for additional credit when topic varies. Three lecture hours a week. Credit: Three hours.

ENVS 4933. Capstone in Environmental Science. Culminating interdisciplinary/interprofessional project. Application of knowledge and skills gained in the environmental science program to solve a real-world problem in partnership with community stakeholders. Prerequisite: Completion of all but the last 24 semester credit hours in the B.S. in Environmental Science program and permission of instructor. Three seminar hours a week. Credit: Three hours.
