Marketable Skills

Marketable skills prepare students for success in a variety of professional settings. Developed through academic coursework, co-curricular engagement, and extracurricular involvement, these skills include communication, critical thinking, teamwork, ethical reasoning, adaptability, and digital literacy. Whether directly related to a student's major or serving as complementary strengths, marketable skills enhance career readiness and reflect TWU's commitment to producing graduates who are prepared to thrive in today's dynamic workforce.

B.A. in Fashion Design

1. Recognize key fashion and consumer trends, predict those trends based on historic and contemporary components of the fashion industry, and utilize current trend information to complete a market analysis and make product design decisions.
2. Utilize the knowledge and values necessary to make sound decisions about the sourcing and production of fashion products, both domestically and globally, considering current laws and regulations, cultural ethics, trading barriers, global consumerism, and social responsibility.
3. Develop and produce visual presentation boards to effectively communicate mood and/or product and marketplace trend information.
4. Design and produce aesthetically pleasing apparel products and integrated fashion apparel collections utilizing basic and complex techniques for construction and fit while demonstrating knowledge of appropriate fabric selection, design principles, the design process, flat pattern making or draping, and line development for specific market segments and target customers.
5. Develop and write product specification sheets that include accurate costing and production details for finished products.
6. Create digital, integrated fashion apparel collections through the use of technical design and line drawings, color stories, line sheets, color and print developments, fashion illustrations and renderings, and computer-based technology.
7. Utilize professional communication and presentation skills to sell designs and products using creative and independent problem solving and conceptual understanding.
