

BACHELOR OF SCIENCE IN NURSING

Web Site: <https://twu.edu/nursing/undergraduate-programs/bachelor-of-science-in-nursing-bsn/>

The TWU Baccalaureate Curriculum for the Bachelor of Science in Nursing (BSN) builds upon a foundation of liberal arts and sciences to produce a graduate who will be able to:

- Deliver nursing care focused on caring and competency in professional knowledge, skills, and values for culturally diverse populations across the lifespan and health continuum.
- Exhibit professional and personal responsibility and accountability in the provision of nursing care.
- Demonstrate critical thinking and clinical decision-making in the delivery, coordination, and collaboration of nursing care.
- Utilize effective systematic inquiry based on research and best evidence to provide safe patient-centered care and continuous quality improvement.
- Incorporate effective communication, collaboration, and advocacy in working with patients, families, groups, communities, and the health care team to improve health care outcomes.
- Demonstrate beginning leadership and patient-centered care in a healthcare system that is influenced by health policy, finance, and regulatory environment.

Our 4-year curriculum is split into two parts. Foundation-forming prerequisite courses are taught at the Denton campus for the first two years. Upper-division program courses are offered in the last two years at medical centers in either Dallas or Houston.
